

Our new project is based on Alaska.

The children will be exploring this fascinating place. They will be using their geographical and scientific skills.

The Home Learning for this project is to create a mini-world in a shoebox (diorama) showcasing an Arctic habitat or Alaskan landscape. You could even create something to represent Alaska; such as a food chain or an Inuit snow hut. You can use any equipment or tools, e.g. painting, recycling, photographs, models. The project is due on Seesaw Home Learning page by **Wednesday 27th January 2021.**

Where in the World? Alaska

Parent Led Activity: Ask your child to justify their chosen mini-world.

Child Led Activity: Use a mixture of media, e.g. paint, felt, wool, playdoh to create your mini-world.

Joint Activity: Plan a draft of the "shoebox".
