

Where in the World? China

In the Foundation Stage, we will be learning about China in our Project 'Where in the World'. We will be learning about different traditions, cultures and comparing China to Mortimer in terms of geographical features and living things.

Joint Activity

Together, research different animals that live in China. Decide together, which animal you are going to focus on. Help your child to learn some facts that they can share at school.

Adult Led Activity

Can you support your child in writing what fact they have found most interesting. Help your child to write their fact in their own words, using their phonic knowledge. Support your child to sound out some of the words by themselves.

Child Led Activity

Each child needs to draw and write a caption about their chosen animal. They may wish to label the different parts of the animal, too.

Home Learning

We would like you to find out about a Chinese animal and write a fact sheet. Please upload a photo or video of your fact sheet by 20th January 2021.

Sharing your learning

Watch out for a travel show recorded by the children on Seesaw!
